

**AMENDMENTS TO THE SPECIFICATION:**

Please amend paragraph [0027] on page 4 as follows:

[0027] Figures 7a, b, c present the third embodiment of the attachment for disengaging the safety mechanism (a) with the outer cap 31 in place, (b) with the outer cap 31 removed, removing the seal carrier 20 and (c) on rotating the ring section 39<sub>2</sub> ~~and~~

Please amend paragraph [0028] on page 4 as follows:

[0028] Figures 8a and b present a cross-section view of the injector in Figure 7 showing a) the safe position and (b) the ready trigger position; ~~and~~.

On page 4, beneath paragraph [0028], please insert the following new paragraph:

[0028A] Figure 9 shows the needle-free injector as shown within Figure 3 but with the button firing mechanism.

Please amend paragraph [0044] on page 8 to read as follows:

[0044] ~~It will be obvious to one skilled in the art that rather than using the blocks 38, the movement of the lever 32 could expose a trigger button, said trigger button subsequently being pressed by the subject to deliver the medication. Figure 9 shows an alternate embodiment from Figure 3 wherein rather than using the blocks 38, the movement of the lever 32 exposes a trigger button 42, the trigger button 42 subsequently being pressed by the subject to delivery the medication.~~
